Abstract (en)
[origin: WO2018224265A1] The present invention relates to a refrigerator (1) comprising a shelf group on which food products to be cooled or frozen are placed, consisting of a fixed shelf (4) composing its rear wall (3) side portion, and a movable shelf (5) placed so as to contact the front edge of the fixed shelf (4) parallel to the rear wall (3) and forming a planar upper surface together with the fixed shelf (4); two bearer brackets (7) on which hook seats are provided in full length in vertical direction, mounted on the rear wall (3) in direction of the right and left vertical edges of the rear wall (3), enabling the shelf group to be placed on a desired elevation in the body (2); two main supports (8) fixed on the right and left edges at the lower surface of the shelf group (6); and at least one hook (9) enabling each main support (8) to be mounted on the hook seats.
