Abstract (en)

[origin: WO2018224277A1] The invention relates to a method, a data protection module (5) and a network system for the data protection of an electronic device (1), on which sensitive data processed by external services, particularly Internet services, is collected or provided. The data protection module is used to automatically calculate data protection configurations (43) for the device (1) on the basis of meta appliance information (41) and meta service information (42).
