Abstract (en)
The invention relates to a sample carrier module comprising a sample module base, a carrier lid and at least one sample slide holder for holding a sample slide in an interior of the sample carrier module, wherein in a transport mode of the sample carrier module the carrier lid covering the sample slide holder extends substantially parallel to the sample slide holder and seals the interior of the sample carrier module to prevent contact between the interior of the sample carrier module and the exterior atmosphere, wherein the carrier lid is detachably attachable to the sample module base such that the carrier lid is removable from the sample module base in a processing mode of the sample carrier module.
