Abstract (en)

[origin: US2020115654A1] The present invention is in the field of washing and cleaning agents and relates to a fragranced shaped body, including a composition obtained by bringing the following components into contact: (a) at least one gelling agent having a molar mass of <2000 g/mol and (b) at least one fragrance. The invention also relates to a washing or cleaning agent, including the fragranced shaped body according to the invention, a method for producing the fragranced shaped body according to the invention and the use of the fragranced shaped body according to the invention for fragrancing surfaces.
