Abstract (en)

[origin: CN113265759A] The invention relates to a method for equipping a guide bar of a warp knitting machine with a knitting tool (2). In the method, the knitting tool (2) is inserted into a groove (3) of a needle bed (4) of the guide bar, the groove (3) having a predetermined gauge. High productivity of the warp knitting machine is desired to be achieved. For this purpose, the knitting tool (2) is provided for use in a receptacle (6) of an insertion tool (1) having the predetermined gauge, the insertion tool (1) being positioned on the needle bed (4) and the knitting tool (2) being transferred into the groove (3) by means of the insertion tool (1).
