Abstract (en)  
A fluid injection assembly is disclosed. It comprises an elongate fluid injector (1) having a valve body (2) and a securing element (10) . The valve body (2) is adapted to be located in a bore (5) of a housing (4) of an internal combustion engine. The securing element (10) is located on the valve body (2) and has a projection (16) engageable in a slot (18) of the housing (4) for securing the fluid injector (1) to the housing to locate the fluid injector (1) in a predetermined position. The projection (16) has at least one deformable element (20) projecting from the main body (14) of the projection (16) the deformable element (20) being deformed when the projection (16) is inserted in the slot (18) so that the projection (16) is held with a force fit in the slot (18).
