Abstract (en)

[origin: EP3637501A1] Disclosed is a bus bar assembly for electrically connecting a plurality of battery cells having electrode leads. The bus bar assembly includes a fixed bus bar provided in the form of a rod-shaped conductor; a pair of movable bus bars disposed to be spaced from both sides of the fixed bus bar in a lateral direction with the fixed bus bar being interposed therebetween to form a fitting space respectively between the pair of movable bus bars and the fixed bus bar so that at least one electrode lead is inserted therein; and an adhering member configured to move the pair of movable bus bars close to the fixed bus bar in a state where the electrode lead is located in the fitting space so that the electrode lead is adhered to the fixed bus bar.
