Abstract (en)
[origin: WO2019018285A2] Systems and methods for processing food products. One aspect is a system for processing food products including a base member, a vessel member defining a vessel volume, an opening formed through the vessel member, at least one vessel lip surrounding the opening; a vessel lid connected to the vessel member to substantially seal the opening; a motor shaft, at least one mixing member connected to the motor shaft and within the vessel volume; a motor connected to the motor shaft; and grinding media within the vessel volume for grinding and mixing food products, where energizing the motor urges the motor shaft and the at least one mixing member to rotate within the vessel volume to agitate the grinding media; and where the grinding media includes first grinding media and second grinding media.
