Abstract (en)

[origin: WO2018229035A1] The present invention relates to a liquid surfactant composition with yield point, comprising, based on the total weight thereof, (i) at least one surfactant at a total amount of 1 to 70 wt%, and (ii) at least one glucosamine derivative of formula (I), wherein R1 is a radical comprising a vinyl group; R2 is hydrogen or a substituted or unsubstituted C1-10 hydrocarbon radical; (iii) optionally at least one additive; (iv) optionally solid particles; and (v) water. A method for textile treatment with a solution that comprises the inventive composition. A method for preparing the inventive composition. And also the use of at least one glucosamine derivative of formula (I) of the present invention for stabilizing liquid surfactant compositions, in order to generate a yield point.
