Abstract (en)

[origin: EP3641261A1] The present invention relates to the technical field of communications, and provides an entrusted login method, a related device and a computer readable storage medium. The method comprises: receiving entrusted login application information transmitted by a first client, and generating a temporary password according to a first account (S201); transmitting entrusted login authorization information to a second client that logs in a second account, the entrusted login authorization information comprising the first account, the second account, and the temporary password (S202); receiving a login request transmitted by the second client and comprising the first account and the temporary password (S203); and authenticating the temporary password, and if the authentication is successful, transmitting a response message indicating entrusted login success to the second client (S204).
