Abstract (en)
[origin: WO2018234699A1] A production apparatus (2) comprises a receiving device (5) designed to receive a first and a second capsule containing a first and a second formulation, respectively, the receiving device (5) being designed to be in an open position in which the first and the second capsule can be introduced into the receiving device (5) and a closed position in which the receiving device (5) holds the first and second capsules in position, said receiving device (5) further being designed in such a way that when the receiving device (5) holding the first and second capsules is moved from the open position to the closed position, the first and second capsules are connected; the apparatus further comprises a mixing machine (6) designed to receive the receiving device (5) holding the first and second capsules, and to mix the first and second formulations contained in said first and second capsules such as to obtain the composition.
