Abstract (en)

[origin: WO2018234934A1] The present subject matter discloses a switch holder assembly for a straddle- type vehicle. The switch holder assembly comprising a frame body (600) of said vehicle, said frame body (600) adapted to support at least one micro switch (601). A switch holder (602) is detachably attached to said frame body (600). The switch holder (602) comprises a base portion, having an exposed surface (602d) and an underside surface (602e), at least one through hole (602a) disposed on the base portion to secure said switch holder (602) on the frame body (600), and at least one vertical projection (602b) projecting from the underside surface (602e). The at least one vertical projection (602b) is configured to completely enclose said micro switch (601) and hold said micro switch (601) in its position.
