Abstract (en)
[origin: WO2018233864A1] The invention relates to an interchangeable body (2) for transporting goods, comprising a base group (4) and comprising supporting legs (6) movable from a transport position into a loading position, wherein the supporting legs (6) are lockable at least in the transport position and in the loading position, and comprising at least one interchangeable body-specific lifting apparatus (8), by means of which the interchangeable body (2) can be lowered and lifted autonomously, wherein the lifting apparatus (8) has an electric motor driving the lifting and lowering of the interchangeable body (2) in the parked state and an interchangeable body-specific power generator supplying the electric motor with electrical energy.
