Abstract (en)

[origin: WO2018233806A1] The present invention relates to a spindle drive (10) for an element to be driven, particularly a door and/or a window element of a vehicle, having integrated locking for locking the element to be driven, comprising a spindle (12) formed in a longitudinal direction and having a spindle nut (16) disposed on the spindle (12) and which may be displaced between an opening position and a closing position, wherein the spindle nut (16) carries a locking device (20) which, in the closed position, is in engagement with a capture sleeve (22) which is arranged in a fixed position and with which the locking device may be interlocked.
