Abstract (en)

[origin: WO2018234582A2] The invention relates to a microscope system (10) comprising a light sheet microscopy functional unit (20, 24, 30), the illumination lens thereof being formed by a first lens (20) and the detection lens thereof being formed by a separate second lens (24), and comprising at least one other light sheet microscopic functional unit (24, 48). The other light microscopy functional unit (24, 48) comprises a detection lens which is formed by the second lens (24).
