Abstract (en)

[origin: WO2018233983A1] The invention relates to a user interface device (10), in particular for a hand-held power tool (12), comprising at least one input unit (14), which is provided at least for inputting at least one piece of information that is processed and/or can be processed automatically, and/or at least one output unit (16), which is provided at least for outputting a piece of information that is processed and/or can be processed automatically. According to the invention, the user interface device (10) has at least one energy transmission unit (18) which is provided for wirelessly transmitting energy to at least one separate energy storage unit (20) and/or for operating a separate electrically operatable device (32).
