Abstract (en)

[origin: CN111086677A] The invention relates to a method for producing packs (10) for products in the cigarette industry. According to the method, the method is implemented in multiple ways. The spacer (33) and the productgroup (15) are input or pushed out in at least two adjacent sockets (85), the sockets (85) are set at the line spacing, and the unfolded cutting piece used for the spacer (33) has a length greater than the distance between the lines; by folding the wall (44) for the partition wall (45), the length of the cutting piece (42) is reduced to a size smaller than the distance between the routes. The invention also relates to a device for producing packs (10) for products in the cigarette industry.
