Abstract (en)
[origin: WO2015036663A1] The invention relates to a gas distribution assembly comprising a gas cylinder (2), a valve block (12) attached to the gas cylinder (2) and a protective casing (1) arranged around said valve block (12), said valve block (12) comprising a device (4) for indicating pressure, such as a manometer, or for indicating the content of the cylinder, such as an autonomy indicating device, and a rotating wheel (6) that can be operated by an operator, for controlling the gas flow, characterised in that the protective casing (1) comprises a first opening (11) on the lower part (1a) of the protective casing (1), within which the device (4) indicating the pressure or the content of the cylinder is housed. The invention further relates to the use of such an assembly for storing or distributing a gas or a gas mixture, especially a gas or a gas mixture selected from oxygen, air, N2O/O2, He/O2 and NO/nitrogen.
