Abstract (en)

[origin: WO2019003204A1] Article (1) of the industry of products adapted to emit a substance to be inhaled, in particular a smoking article; the article (1) comprises a group (2) of segments comprising, in turn, a first segment (3) and at least a second segment (5), which are arranged in succession along a longitudinal extension of the group (2) of segments so that the first and the second segments (3, 5) are spaced apart from one another and an empty space (6) is arranged between them; the article (1) comprises a first and a second wrapping sheet (7, 10) which are partially overlapped and staggered one with respect to the other; at least one among the first and the second sheets (7, 10) delimits the empty space (6) radially relative to the longitudinal axis (A) of the group (2) of segments.
