Abstract (en)

[origin: WO2019002933A1] The veterinary compositions or dietary or feed supplements are useful in the prevention or the treatment of behavioral, respectively age-related disorders, troubles and pain in mammals. They are also for supporting or strengthening the immune system, the behavioral balance of mammals and for supporting the natural inflammatory response. These compositions or supplements are in the form of water soluble polysaccharide- based granules which comprise as the source of cannabinoids a standardized oil or extract of hemp (*Cannabis sativa* L.) essentially devoid of psychotropic substances.
