Abstract (en)

[origin: WO2019002090A1] The invention relates to a device (10) which is used to provide padding material (14) for packaging purposes. The device comprises a container (12) for storing the padding material (14) and a discharge device (28) for discharging the padding material (14) out of the container (12). The discharge device (28) comprises a driven conveyor means (30) for conveying the padding material (14) along a conveyor path (48), wherein the conveyor means (20) is supported on a movable base (50) which can be moved (68) out of an operating position into a release position and back, said conveyor means (30) being moved out of the conveyor path (48) in the release position.
