Abstract (en)
[origin: WO2019001735A1] A system (2) for making available moist cloths (14) impregnated with an impregnating solution has a plurality of impregnated moist cloths (14), a storage container (4) for storing the moist cloths (14), and one or more flat, liquid-impermeable separating layers (18) for the separation of two juxtaposed moist cloths (14). The storage container (4) is configured to provide a closed casing for the moist cloths (14) and has a bottom (6) and a closable withdrawal opening (10) from which the moist cloths (14) can be individually withdrawn from the storage container (4). The moist cloths (14) in the storage container (4) are stacked in the direction from the bottom to the withdrawal opening (10). A separating layer (18) is arranged at least between two successive moist cloths (14).
