Abstract (en)
[origin: WO2019001806A1] The invention relates to a paper machine clothing draw-in device for drawing a paper machine clothing, in particular a drying screen, into a machine designed to produce and/or finish a material web, in particular a fibrous web, such as a paper, board or tissue web, comprising a force-distributing element, which is designed to distribute a tensile force, which acts substantially at a point, substantially uniformly along a line. According to the invention, the paper machine clothing draw-in device comprises a plurality of such force-distributing elements, which are designed to become or to be connected to each other in normal use.
