Abstract (en)
[origin: WO2019005625A1] A computer implemented method for automatically generating lyric videos comprising receiving an audio selection, determining timing information of the audio selection, and determining lyric information of the audio selection. The method includes receiving tone information of the audio selection and generating video content based on at least one of the timing information, the lyric information, and the tone information of the audio selection. The method also includes rendering a lyric video based on the video content and the audio selection.
