Abstract (en)
[origin: WO2019002596A1] The invention relates to a battery cell (2), comprising a cell housing, in which an electrode unit (10) is arranged, wherein the electrode unit (10) has an anode, which is electrically connected to a negative terminal (11), and a cathode, which is electrically connected to a positive terminal (12), the cell housing having a first housing part (61), which forms the negative terminal (11), and a second housing part (62) which forms the positive terminal (12). The first housing part (61) is made of a hybrid material, comprising a first layer (81) made of copper and a second layer (82) made of aluminum.
