Abstract (en)
[origin: CN111002271A] A handheld power tool (100), especially a battery-driven screwdriver, is proposed, which has a handheld power tool housing (110), a tool axis (112), a drive unit (120) for driving a tool receiver (128), and a controlling unit (160) for controlling a signal-giving unit (170), wherein the signal-giving unit (170) is designed to activate the drive unit (120). It is proposed that the controlling unit(160) has at least one controlling element (162) movably supported in the first direction (102), and the signal-giving unit (170) has at least one signal-giving element (172) movably supported in thesecond direction (104), wherein the first direction (102) is different from the second direction (104).
