Abstract (en)  
[origin: US2020130897A1] The invention relates to a paper bag for storing and transporting goods, having a main body, a first opening at one end of the main body for removing the goods and a flap connected to the main body which is designed to close the first opening by folding over. The paper bag also has a second opening for introducing the goods into the main body which lies opposite the first opening.
