Abstract (en)
This is a new process for making tanks, swimming pools, fountains and artificial lakes in general, comprising the step of shaping all or part of a solidified shaped surface (A) by means of positioning one or more shaped compact bodies (1, 1') of lightened material, said shaped compact bodies (1, 1') being adapted to maintain the shaped form as a function of the desired form of said solidified shaped surface (A) to be obtained, and wherein said lightened material has characteristics of specific weight and permeability as a function of the surrounding terrain. The present patent also regards the obtained tank.
