Abstract (en)
[origin: WO2019007462A1] The problem addressed by the invention is that of eliminating the disadvantages of the use of algae (taste and odor) by adding natural products. Surprisingly, this was found by means of a new chocolate creation, the positive properties of cocoa for the human body additionally being utilized. The chocolate-based food supplement consists in a basic mass of 100 g of 0 to 55 g cocoa mass, 5 to 47 g sugar and/or sugar substitutes, 0 to 28 g cocoa butter, 0 to 25 g milk powder, 0 to 5 g nuts/almonds, 0 to 25 g fruit, and 1 to 10 g roughage, bound water and/or lecithin. Algae (spirulina and/or AFA and/or chlorella), acerola, amaranth and fruit are added. The mixture ratio, relative to 100 g, is composed as follows: 50 to 75 g basic mass, 5 to 25 g algae (spirulina and/or AFA and/or chlorella), 0.5 to 5 g acerola, 0 to 15 g amaranth, and 0 to 25 g fruit, vegetables, kernels, seeds, teas, grasses, and/or spices.
