Abstract (en)

[origin: WO2019007799A1] The invention concerns a cassette (1) for storing and dispensing products that are not purely gaseous, comprising: - a housing (2); - a drum (3) that is rotatably guided relative to the housing (2) about an axis (8) of rotation passing through the centre of the drum (3); - a chamber for storing products that are not purely gaseous; - an immobilising device (5) capable of: in a first position, referred to as the immobilising position, immobilising the drum (3) in rotation relative to the housing (2), and; in a second position, referred to as the rotation position, allowing the drum (3) to rotate relative to the housing (2); characterised in that it has an axial passage (7) extending along the axis (8) of rotation of the drum (3), and in that; - the immobilising device (5) comprises at least one push button (9) arranged relative to the axial passage (7) in such a way as to be able to be moved: .by a release member inserted into the axial passage (7); .to a position of the push button, referred to as the release position, in which the immobilising device (5) is in the rotation position.
