Abstract (en)
[origin: WO2019007642A1] A filter medium (200, 300), in particular for the filtration of water, comprising at least one first layer (201, 301) as a support layer and a second layer (202, 302) as a filtration layer arranged downstream of the first layer (201, 301), wherein both the first layer (201, 301) and the second layer (202, 302) have at least one at least antibacterial active substance. A filter element, a use of the filter element and a method for producing the filter medium are also disclosed. The invention finally also relates to a water injection system having a filter element according to the invention.
