Abstract (en)  
[origin: WO2019007593A1] In a portable circular saw (100) having a sole plate (122), a housing (110) and a drive unit (120) which is arranged at least partially in the housing (110) and to which a tool receptacle (140) for an interchangeable saw blade (130) is assigned, wherein the drive unit (120) is configured to drive the interchangeable saw blade (130) in rotation about an associated axis of rotation (142), and wherein the portable circular saw (100) is guidable along a workpiece (160) by means of the sole plate (122), a securing device (170) having at least one sensor element is provided, wherein the securing device (170) is configured to detect at least one breaking of the portable circular saw (100) into the workpiece (160) during a sawing operation and, upon detecting any breaking into the workpiece (160), to brake and/or switch off the drive unit (120).
