Abstract (en)

[origin: WO2019007749A1] The present invention relates to a method for laminating a metal tape (3) with a film (4), wherein the metal tape is heated to a predetermined temperature, the heated metal tape is guided over a cooled first cooling roller (5), wherein a film to be laminated onto the metal tape is introduced between the metal tape and the first cooling roller and thus lamination without a counter roller takes place.
