Abstract (en)
[origin: WO2019009832A1] The invention relates to an embodiment for hybrid-turf bottom fibers that enables growth of roots and leaves of the natural grass between the synthetic turf yarns by applying an organic and/or inorganic filler between the synthetic turf yarns where the grass seeds can grow. In particular, the invention relates to an embodiment for hybrid-turf bottom fibers that allows the zones where the grass seeds will grow to be more porous and stronger attachment of the synthetic yarns, and that facilitate growth of the grass roots into farther depths.
