Abstract (en)
[origin: WO2019008319A1] A method and system for performing deferred searching comprising receiving an event input identifying event data for an event on an event date in the future from a user at a user interface, receiving a query input from the user at the user interface, processing the query input using the event data to generate a query using a processor, transmitting the query in dependence upon the event data, and receiving search results responsive to the transmitted query.
