Abstract (en)

[origin: WO2019008320A1] A method of indicating emotive responses in a virtual meeting, the method comprising creating or select avatar data defining one or more avatars to represent one or more corresponding users in response to input from the one or more corresponding users; receiving one or more user selections of meeting data defining one or more virtual meetings, a user selection comprising an indication that the user is attending the virtual meeting; generating an output for display of a virtual meeting with one or more avatars representing one or more users attending the meeting using the avatar data and the meeting data corresponding to the virtual meeting; receiving emotive input data from one or more users indicative of an emotive response or body language of the one or more users attending the virtual meeting; processing the avatar data using the emotive input data; and updating the output for display of the virtual meeting to render the one or more avatars for the one or more users to display a respective emotive state dependent upon the respective emotive input data.
