Abstract (en)

[origin: WO2019008548A1] The present invention relates to a method, a computer system and a computer program product for managing personal data. An event log and a user database are stored on a data storage system. The user database comprises a plurality of personal data items. A first microservice is configured for changing a personal data item in the user database and adding to the event log a change event concerning the modification of the personal data item and comprising a code. A second microservice is configured to, if necessary, request the modified personal data item from the first microservice using the code, based on the detection of a message concerning the change event.
