Abstract (en)

The object of the invention is an apparatus (10') for a brushing device (33), which brushing device is intended for brush rings (31) and which includes a shaft (20) arranged for the said brush rings, and an axial (A) locking profile (22) fitted to the shaft to prevent the rotation of the brush rings. The apparatus (10') is an adapter (10) for arranging brush strips (50, 50') on a shaft intended for brush rings. The apparatus includes an annular base part (12), which is on its inner circumference (17) arrangeable to lock in circumferential direction to the axial locking profile fitted to the shaft. The base part is on its outer circumference (18) equipped with fits (14) arranged in the shape of the base (54) of a brush strip to receive brush strips and arrange them using the adapter on a shaft intended for brush rings. In addition, the invention also relates to an arrangement, a set of brushes, and a method.
