Abstract (en)
A system (20) for displaying safety related data of an electronic elevator safety component (22) comprises an electronic elevator safety component (22) configured for providing and transmitting data to be displayed; and a display device (24) comprising a display (28) with at least two display portions (28a, 28b), the display device (24) being configured for receiving and displaying the data transmitted from the electronic elevator safety component (22) on the display (28). The electronic elevator safety component (22) is configured for transmitting the data to be displayed as at least two data portions (25a, 25b). The display device (24) is configured for displaying each data portion (25a, 25b) on a respectively associated display portion (28a, 28b) thereby forming a total image on the display (28) based on the received data such that modifications and/or errors in the data result in at least one inconsistency within the total image, said at least one inconsistency being apparent to a human watching the total image.
