Abstract (en)

The present invention relates to a method of producing a coal briquette and a coal briquette produced by using the same, and the method includes: preparing raw materials including pulverized coal and dextrin; producing a mixture by mixing the raw materials; aging the mixture; and producing a coal briquette by molding the aged mixture, and the present invention may suppress the generation of a low melting point compound when molten iron is produced, such that damage to facilities caused by a deposit may be prevented.
