Abstract (en)

[origin: WO2019014035A1] A method for formatting an image sized for use with jewelry includes selecting a jewelry design from among a plurality of designs, selecting an image for reproduction, editing the selected image to fit in a virtual display frame representative of and corresponding to a physical frame of the selected locket, and generating a cutout layout of the edited image on a printable media of a predetermined size, which when printed, includes a reproduction of the selected image sized to fit the selected jewelry. Selecting an image may include selecting a digital image from a user's social media account. Also, the method may include generating user-directed queries related to at least one of lifestyle, passions, and interests, receiving responses from the user to the user-directed queries, and based on the received responses, generating suggested indicia for selection by the user.
