Abstract (en)  
[origin: WO2019011467A1] The invention relates to a method for sealing partly prepared meals (30), wherein the meals (30) are positioned on a dish unit (1) and covered with a film (15). An interspace (16) between the dish unit (1) that is provided with a meal (30) and between the film (15) is partly evacuated. The sealing machine (200) for sealing a partly prepared meal (30) positioned on a dish unit (1) comprises a film feed (201) in order to feed a film (15) to the dish unit (1), and a suction apparatus (202) in order to evacuate an interspace (16) between the dish unit (1) provided with a meal (30) and between the film (15). Using the sealing machine (200), the interspace (16) between the dish unit (1) provided with a meal (30) and between the film (15) is partly evacuated.
