Abstract (en)

[origin: WO2019011850A1] The invention relates to a method of storing and transporting a set of multiple coils of 6xxx- series aluminium alloy sheet material in a T4 or T4P condition, wherein said coils are stored and transported in a housing defining a storage area adapted and configured to receive and store said coils, and wherein the housing is formed by an intermodal container comprises a temperature control unit integrated with said housing operative to control the temperature within said storage area defined by said housing to a temperature in a range of 15° C or less.
