Abstract (en)

[origin: WO2019011723A1] The invention relates to an end cap for a profiled rail, having a connector for connecting the end cap to the profiled rail and at least one opening through which a fastening bolt can be guided to mount the profiled rail. According to the invention, the at least one opening has a local narrowing of the cross section for pre-fixing the fastening bolt in the opening. The invention also relates to assemblies which include an end cap of this type.
