Abstract (en)
[origin: WO2019010510A1] The invention relates to a wire handling device (1) for a manufacturing device (2) comprising an elongate first wire guiding device (3) having a first guiding section (4) for a wire (5) that is to be guided along the first guide section (4) and an elongate second wire guiding device (6) having a second guiding section (7) for a wire (5) that is to be guided along the second guide section (7), said wire handling device (1) comprises a support device (10), the first wire guiding device (3) and the second wire guiding device (6) are placed on the support device (10), the support device (10) is rotatably mounted about the rotational axis (R), the first wire guiding device (3) and the second wire guiding device (6) are mounted so that they can be moved with respect to each other.
