Abstract (en)

Feeding method and unit (8) to feed two wrapping sheets (5) in a packing machine (6), in particular for smoking articles. The following steps are provided: feeding an initial wrapping sheet (15) with a double width; making a pre-weakened separation line (13) in the initial wrapping sheet (15); and dividing the initial wrapping sheet (15) with a double width into two so as to obtain two final wrapping sheets (5) with a single width by applying a force that causes a tear along the pre-weakened separation line (13).
