Abstract (en)  
[origin: EP3653521A1] A tray is described for transporting and displaying foodstuff products, comprising a sheet that is folded so as to define:- a bottom (2);- a first pair of side walls (4, 6) oriented along a first direction (Y); and- a second pair of side walls (8, 12) oriented along a second direction (X) transversal to said first direction (Y),said tray being characterized in that said folded sheet, furthermore, defines:two separating walls (14, 16) that extend along said first direction (Y), and are parallel to one another and are spaced apart from each other so as to divide the tray in distinct compartments (C);wherein said separating walls (14, 16) extend along said first direction (Y) so far as to place respective opposite edges immediately next to said second pair of side walls (8, 12),wherein said separating walls (14, 16) and/or said second pair of side walls (8, 12) have connecting portions (132) that connect said opposite edges of said separating walls (14, 16) to said second pair of side walls (8, 12).
