Abstract (en)
This disclosure relates to a mobile terminal (100) for improving performance of an optical device (11) located under a display module (17). The mobile terminal (100) includes an optical device (11), a display module (17), and an optical antireflective film (15). The display module (17) is located above the optical device (11). The optical antireflective film (15) is located on the display module (17) and corresponds to the optical device (11). The technical solution of the present disclosure can improve the performance of the optical device (11) located under the display module (17).
