Abstract (en)  
[origin: WO2019015714A1] The invention relates to a hybrid module (1) for a drive train of a motor vehicle, the hybrid module comprising a dual clutch (2), which has a first clutch (3) and a second clutch (4) for selectively transmitting torque from a first drive unit (5, 6) to an output shaft (7, 8), and a disconnect clutch (9) for coupling a second drive unit and for transmitting torque from the second drive unit to the output shaft (7, 8). At least one rotary feedthrough (10, 33, 34, 52) is present which is designed to conduct actuating oil for actuating the disconnect clutch (9), or to conduct cooling oil for cooling the disconnect clutch (9) and/or the dual clutch (2).
