Abstract (en)

[origin: WO2019016471A1] The invention relates to a method for managing a traction chain (3) of a motor vehicle (1). According to the invention, the method comprises the following steps: a) determining a predictive rolling resistance coefficient (Crr) of at least one pneumatic tyre (10) of the motor vehicle (1); and b) adapting the operation of the traction chain (3) according to the predictive rolling resistance coefficient (Crr) in order to particularly optimise the energy consumption of the motor vehicle (1).
